## Introduction

Lango is an innovative blockchain-based game designed to merge the excitement of gaming with the transparency and security of blockchain technology. Our vision is to create an immersive and engaging experience where players can explore, compete, and collaborate in a decentralized environment. This white paper outlines the key features, roadmap, and tokenomics of Lango.

## Game Overview

Lango places players in a vibrant virtual world where they can collect, trade, and battle unique lizard characters. Each character is an NFT (Non-Fungible Token), ensuring that every asset in the game is unique and owned by the player. The game leverages blockchain technology to provide transparency, security, and true ownership of in-game assets.

## Use Cases and Value Proposition

Lango tokens have the following use cases:

- In-Game Earnings: Users can earn LG tokens by completing specific tasks or interacting within the Telegram game.
- Community Interaction: Users can gain additional rights and rewards by sharing their earned tokens within the community.
- NFT Market: Various NFTs can be purchased using LG tokens in the NFT store that will be launched within the Lango ecosystem.
- Value Increase: Token burning events will reduce the number of tokens in circulation, thereby increasing the value of the tokens.

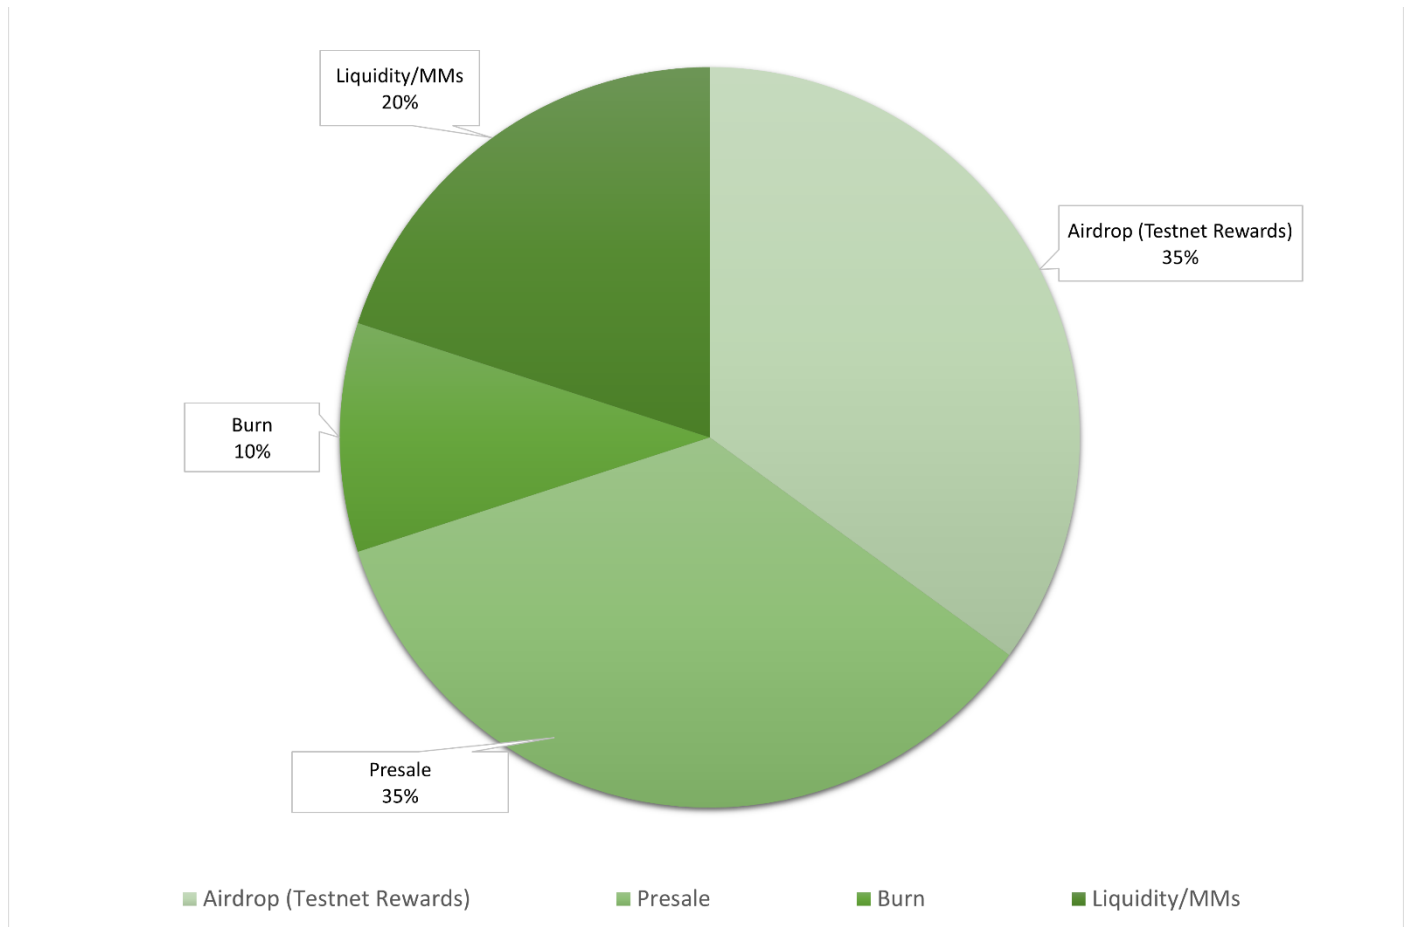

## Technical Details

- Token Name: Lango
- Token Symbol: LG
- Total Supply: 1,000,000,000 LG
- Token Standard: Solana
- Smart Contract Address: To be specified upon release

# Tokenomics

## Token Distribution

- Airdrop (Testnet Rewards):35%
- Presale: 35%
- Burn: 10%
- Liquidity/MMs: 20%

## Acquisition Methods

Players can acquire Lango Coins through various methods:

- Airdrops: Distributing coins to early supporters during initial launch phases.
- Tasks and Achievements: Completing various in-game tasks and achievements to earn rewards.
- Daily Login Rewards: Earning small amounts of coins through daily logins.
- Competitions and Contests: Participating in in-game competitions and contests.
- Market Purchases: Buying Lango Coins on CEX and DEX.

## Incentive Mechanisms

To encourage active participation, Lango's tokenomics includes various incentive mechanisms:

- Task and Achievement Rewards: Players earn tokens by completing daily tasks and achieving milestones, promoting continuous engagement.
- Referral Rewards: Players receive rewards for inviting new users to join the game, fostering growth.
- Liquidity Provision Rewards: Providing liquidity to the liquidity pools rewards players with additional tokens.

## Token Burning

To maintain scarcity and value, Lango will implement regular token burning events:

- Transaction Fee Burning: A portion of transaction fees will be used to burn tokens periodically.
- Event-Based Burning: Tokens collected during specific events will be burned, further reducing the total supply.

## Lango (LG)Coin Roadmap

### Quest 1

- Airdrop Start: Lango airdrops have started!
- Game Platform Beta Launch: The beta version of the Lango game platform is introduced to users.

### Quest 2

- Mainnet Test: Mainnet test phase begins.
- Airdrop Distribution: Airdrop distributions will be conducted.
- New Partnerships and Collaborations: New partnership and collaboration agreements will be announced.

### Quest 3

- CoinGecko and CoinMarketCap Listing: Lango Coin will be listed on CoinGecko and CoinMarketCap.
- Marketing Campaigns: Extensive marketing campaigns with 100+ Key Opinion Leaders (KOLs) will be launched.
- CEX and DEX Listing: Listing processes on centralized and decentralized exchanges will be completed.
- Creation of Liquidity Pools: Liquidity pools will be created and liquidity will be provided.

### Quest 4

- NFT Store Opening: The Lango NFT store will be opened.
- Token Burning Events: Token burning events will be organized.
- New Game Launch: A new game will be added to the Lango ecosystem.

## Transparency

The Lango project is built on transparency and trust. All transactions and updates will be openly shared with our community.

## Farming and NFT Purchase

Within the Lango ecosystem, users can stake and farm LG tokens and use the tokens they earn to purchase various NFTs from the NFT store. This mechanism allows users to earn passive income and contribute to the growth of the ecosystem.

## Swap and CEX Listing

Our website features Phantom (Solana) wallet integration, allowing users to manage their LG tokens securely and easily. Additionally, we will add a swap feature within the site, enabling users to exchange LG tokens for Solana (SOL).

We are not yet listed on centralized exchanges (CEX), but we have plans to be listed sequentially on several Tier 1 CEXs.

## Disclaimer

The Lango project aims to provide the best service to its investors and users. However, there are risks such as volatility in the cryptocurrency markets, regulatory changes, and technical challenges. The information stated in this document may change

in the future, and investors should conduct their own research
